Ilias Vasilos

Solo show

BETWEEN SPACE AND TIME

DL gallery presents on Sunday 22/05/2022 the solo show of Ilias Vasilos "Between Space and Time".

In his solo exhibition "Between Space and Time", Ilias Vasilos invites us to wander along the vast chromatic fields and unpredictable structures of his work. Searching out the relationship between space and time, he creates oil paintings on large surfaces of canvases and structures from painted wood, whereas through his repetitive style a detailed relationship with time, the unit and the whole arises. The visual beguilement in his works appears when, through his utterly numbered methodologies, we are suddenly swayed into the endless galaxies of his cubist structures — as they emerge from within each other. The exhibition presents a series of works that clearly capture the purpose of the artist: the observation of things looking at them from different angles, always hovering in the labyrinth of time.
